DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:
2. Applicant's arguments regarding the combination of Terui and Sakakibara, filed 9/29/08 have been fully considered and are persuasive.

On page 13, Applicant argues that such a combination would not have been obvious because Terui and Sakakibara disclose two different forms of palladium when discussing the synergistic effects between palladium and silver in the ozone removal system. The examiner finds this argument persuasive, and as such, amended claim 6 is allowable over the prior art. More specifically, claim 6 claims an ozone removal system with two catalytic components, one of Ag or AgO and one of PdO or PdO₂. The prior art neither teaches nor suggests such a catalyst composition disposed on titania in an ozone removal system, as claimed.

Claim 1, as amended, now eliminates palladium metal as a possible second catalytic component. As such, the prior art neither teaches nor suggests an ozone removal system which contains a titania catalyst support, a first catalytic component consisting of Ag or AgO and a second catalytic component consisting of PdO or PdO₂ along with the structure of an ozone removal system.

Applicant's arguments regarding the rejection of claims 1-4 and 6-8 under 35 USC §112 1st paragraph is persuasive.

Applicant argues, on page 10, that the examiner construed the disclosure of the original specification construing the terms 'consisting of' and 'comprising' too narrowly. The examiner finds this argument persuasive and the rejection is hereby withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
